

**ARKA KAPAK KONTROLLÜ
AÇIK DEVRE HİDROLİK YÖN VENTİLİ
FOR DUMP TRUCKS
REAR COVER CONTROLLED
OPEN LOOP HYDRAULIC DIRECTIONAL VALVE**

**POUR LES BENNES BASCULANTE
DISTRIBUTEUR HYDRAULIQUE
AVEC CONTROLE DU COUVERCLE ARRIERE**

Montaj: Hidrolik depo üstü ve şase üstü şeklinde kullanılabilir.
Montage: Utilisation possible sur chasis et reservoir
Montage: Upper of tank and upper of chasis

Kaldırma
Tipping
Soulevement de la benne
Kontrollü İndirme
Controlled Lowering
Dessante sous controle

FAYDALARI

YÜK BOŞALTMA ESNASINDA TELESKOPIK SİLİNDİR ÜÇÜNCÜ KADEMEDEN SONRA BASINCI DÜŞMEYE BAŞLADIĞINDA ARKA KAPAK BOŞALAN YÜKÜN ÜZERİNE DÜŞMEKTEDİR. BUNUN SONUCUNDA SERT YÜKLERDE ARKA KAPAK , KAPAK KOLLARI VE SİLİNDİRLER ZARAR GÖRMEKTEDİR. BU NEDENDEN DOLAYIDIRK, ARKA KAPAK KONTROLLÜ AÇIK DEVRE HİDROLİK YÖN VALFİNİ ÖNERİYORUZ.

AVANTAGES

LORS DU DECHARGEMENT DE LA BENNE LA PRESSION HYDRAULIQUE DIMINUE A PARTIR DU TROISIEME NIVEUX DU VERIN TELESKOPIQUE ET LE COUVERCLE ARRIERE SE REFERME SUR LE CHARGE. SUITE A CE MOUVEMENT , LES RISQUE D'ENDOMMAGEMENT EST INDISPENSABLE SUR LE COUVERCLE ARRIERE, LES BRAS DU COUVERCLE ET SUR LES CYLINDRES. C'EST POUR CELA QUE NOUS CONSEILLONS LE DISTIBUTEUR HYDRAULIQUE AVEC CONTROLE DU COUVERCLE ARRIERE

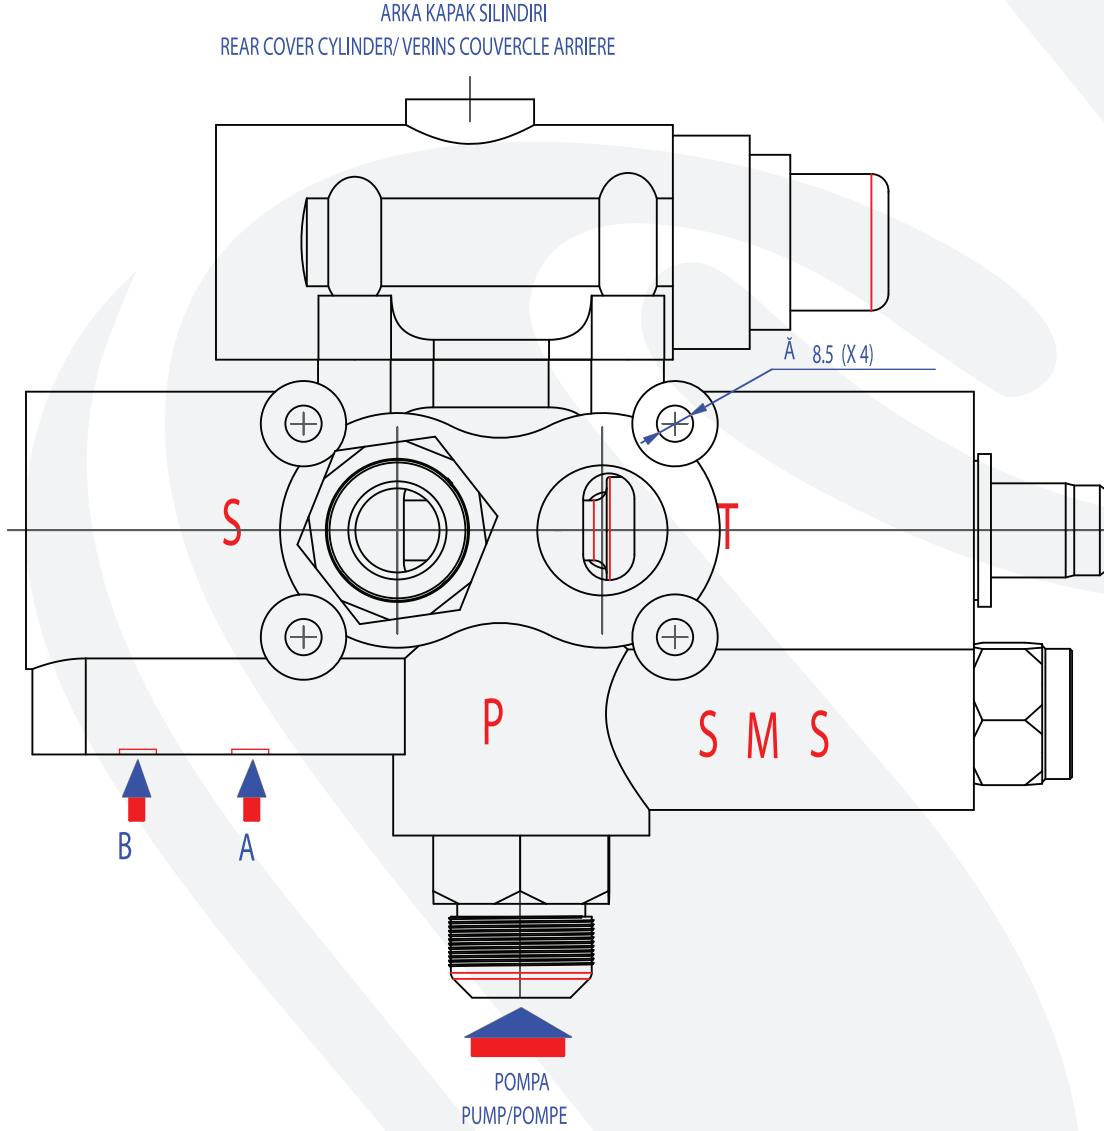

ADVANTAGES

DURING TIPPING, THE TELESKOPIK CYLINDER'S PRESSURE GETS LOWER AFTER THE THIRD STAGE AND REAR COVER FALLS TO TOP OF THE LOAD, THEREFORE REAR COVER AND REAR COVER'S CYLINDER'S TAKE DAMAGE BUT OUR NEW VALVE PREVENTS TO HAPPEN THIS. IT HOLDS REAR COVER ON THE TOP DURING TIPPING . WE SUGGEST TO USE OUR NEW VALVE.
